

Exampportal

A website for meet to right tests.

By

Ch.B.Neeraj.Singh

Problem description

- As During this pandemic situation like covid 19 it become difficult to teachers and students to conduct test as they need to take internal marks or analyis the person knowledge .
- Physical exam is not a better option which is of time waste ,and also lots of paper usage

Problem Solution

- As we are in a digital development world and most of us have our gadgets with internet so in order to avoid the paper usage and time waste we introduced a website for creating tests and that is attended by the students through online from their places

Technology used

- It is a complete web-development project with a dynamic and advance webpages
- We used CSS,HTML,JS,Jquery,PHP,Ajax,Sql.

Login authentication

- In this we have 4 login authentication checks
 - 1) **Student login** : where the student details will be checked with password and username
 - 2) **Teacher login** :Where a verified teacher is checked for access his test or to create
 - 3) **Admin login** : where the admin will be veified with details and his login page is kept secrete with secrete button(in contact div)
 - 4) **Test login** :Where test accese is given to students who knows password(informed by teacher)

Note:admin login is in fotter (click on the contact 6 to 7 times to open)

Teacher Functionality

- Every teacher will be verified by the admin and activated there account.
- Where the teacher can create a test and view results of tests which teacher has created
- Other teacher test will not be know to other teacher
- In each test teacher need to provide student password.
- Tests can be activated and deactivate by the teacher .

Student Functionality

- Students can login after signup
- Student will be provided with test name ,professor name,date of test created ,status wheter it is active or not,take test button in home page
- Student can select his test which is active status and enter the test password then he can write the test
- After the test completed he will dispalyed with his marks obtained in it and sends to home page
- **Note** ::it is designed as one student can attend the test only one time .

Admin Functionality

- Admin Have a functionality to verify the teachers
- Admin can also see all the test details and results
- He can also delete the tests created by other teachers
- He can deactivate teacher or student account.

Thank you.
